VIJAY KUMAR CHELLUBOYANA

Cloud / DevOps Engineer

vijaychelluboyana@gmail.com| +1 (347) 433-6878
Columbia, MD | Open to Relocation | Open to Hybrid/Remote

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 4+ years of experience delivering enterprise-scale cloud solutions for US-based clients in fast-paced consulting environments. Proven expertise in AWS and Azure cloud platforms, Infrastructure as Code (Terraform, CloudFormation, CDK), CI/CD pipelines, and Kubernetes/EKS. Strong experience working across multiple client projects, collaborating with onshore/offshore teams, and supporting production environments under SLA commitments. Adept at client communication, rapid onboarding, and delivering secure, scalable, and cost-optimized cloud solutions.

TECHNICAL SKILLS

Cloud Platforms: AWS, Azure
DevOps / CI/CD: Jenkins, GitHub Actions, AWS CodePipeline
Infrastructure as Code: Terraform, AWS CloudFormation, AWS CDK, ARM Templates
Containers & Orchestration: Docker, Kubernetes, Amazon EKS, Helm
Monitoring & Logging: CloudWatch, Prometheus, Grafana, Splunk, Dynatrace, Nagios
Configuration Management: Ansible, Chef, Puppet
Networking & Security: VPC, IAM, Route 53, WAF, VPN, Load Balancers, Firewalls
Operating Systems: Linux, Windows
Scripting / Programming: Python, Shell, Core Java
Version Control & Tools: Git, GitHub, GitLab, Bitbucket, Jira, Confluence

PROFESSIONAL EXPERIENCE

Cloud Engineer

Welldoc – Columbia, MD
July 2024 – Present

- Designed and implemented **highly available AWS architectures** using VPC, public/private subnets, ALB, NAT Gateway, and multi-AZ deployments.
- Led **Infrastructure as Code initiatives** using **Terraform, CloudFormation, and AWS CDK**, ensuring consistent deployments across dev, QA, and prod environments.

- Built and managed **Amazon EKS clusters**, configured managed node groups, autoscaling, IAM roles for service accounts, and secure networking.
- Implemented **CI/CD pipelines** integrating GitHub Actions and AWS services to automate build, test, and deployment workflows.
- Configured **CloudFront CDN with S3 and ALB origins**, improving global performance and reducing application latency.
- Implemented **AWS WAF and security group hardening** to protect applications from OWASP Top 10 vulnerabilities.
- Automated **AMI creation, cross-region copy, and cross-account migration** to support disaster recovery strategies.
- Implemented **CloudWatch monitoring and SNS alerts**, enabling proactive incident detection and faster MTTR.
- Performed **Linux and Windows server patching**, remediating critical vulnerabilities and ensuring compliance.
- Supported **production troubleshooting and on-call rotations**, resolving P1/P2 incidents and performing RCA.

DevOps Engineer

DXC Technology – Hyderabad, India
Jan 2022 – Aug 2023

- Designed and deployed **Azure infrastructure** including VMs, VNets, NSGs, VPNs, and Azure AD for secure enterprise workloads.
- Automated infrastructure provisioning using **Terraform and ARM templates**, improving scalability and reducing manual effort.
- Built **CI/CD pipelines using Jenkins**, reducing deployment time by **50%+** and improving release reliability.
- Containerized applications using **Docker**, created Dockerfiles, and managed container images across environments.
- Assisted in deploying and managing **Kubernetes clusters**, configuring services, ingress controllers, and autoscaling.
- Implemented **monitoring and logging solutions** using Prometheus, Grafana, Azure Monitor, and Log Analytics.
- Used **Ansible and Chef** for configuration management and automated server provisioning.
- Worked closely with development, QA, and operations teams in a **DevOps culture**.
- Provided **24x7 production support**, handling infra-level issues and improving system stability.

Cloud Engineer

Cedar InfoTech – Hyderabad, India
Aug 2020 – Dec 2021

- Managed **AWS EC2, IAM, EBS, S3, ELB, CloudWatch, and SNS** in production environments.
- Created and maintained **Auto Scaling Groups** to ensure high availability and fault tolerance.
- Automated server provisioning and configuration using **shell scripting and IaC practices**.
- Configured **CloudWatch alarms** for CPU, memory, and disk monitoring.
- Performed **Linux and Windows patching**, backup management, and vulnerability remediation.
- Supported **multi-region VPC architectures** and enterprise networking configurations.
- Troubleshot application and infrastructure issues, ensuring minimal downtime.

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional
- Microsoft Certified: Azure DevOps Engineer Expert
- HashiCorp Certified: Terraform Associate
- Certified Kubernetes Administrator (CKA)

EDUCATION

Master of Science in Computer Science
Pace University, New York | **2025**
